

CALL FOR PAPERS

The 34th IEEE Real-Time Systems Symposium – RTSS 2013

Vancouver, Canada
Sponsored by the IEEE Computer Society
Technical Committee on Real-Time Systems

Scope of the Conference

IEEE Real-Time Systems Symposium (RTSS) is the premier conference in the area of real-time systems, presenting innovations in the field with respect to theory and practice. RTSS provides a forum for the presentation of high-quality, original research covering all aspects of real-time systems design, analysis, implementation, evaluation, and experiences. RTSS'13 continues the trend of making RTSS an expansive and inclusive symposium, looking to embrace new and emerging areas of real-time systems research.

RTSS'13 welcomes submissions in all areas of real-time systems, including but not limited to operating systems, networks, middleware, compilers, tools, modeling, scheduling, QoS support, resource management, testing and debugging, hardware/software co-design, fault tolerance, security, power and thermal management, embedded platforms, and system experimentation and deployment experiences.

In addition to the main real-time track, we will continue the successful format of previous years with three specialized tracks:

- **Cyber-physical systems**
- **Design and Verification**
- **Wireless Sensor Networks**

Although authors will choose which tracks to submit papers to, a paper may be redirected to a more appropriate track. All papers will appear in the main program and proceedings.

Paper Submission Guidelines

Paper submissions should be up to 10 pages, following the IEEE conference proceedings format, in a PDF document and must describe original work not previously published and not concurrently submitted elsewhere. More information and additional guidelines on the 10 page limit and on the originality rules are posted at www.rtss.org.

Important Dates

May 15, 2013 – **FIRM** Submission Deadline
July 26, 2013 – Notification of Acceptance
September 22, 2013 – Camera-ready Deadline
December 3, 2013 – Workshops
December 4 to December 6, 2013 – Symposium

Organizing Committee

General Chair:

Chenyang Lu, Washington University, USA

Ex-Officio (TC Chair):

Steve Goddard, University of Nebraska-Lincoln, USA

Cyber-Physical Systems Track Chair:

Alfons Crespo, Technical University of Valencia

Wireless Sensor Networks Track Chair:

Mário Alves, Politécnico do Porto, Portugal

Publications Chair:

Shinpei Kato, Nagoya University, Japan

Publicity Chairs:

Harini Ramaprasad, Southern Illinois University, USA

Insik Shin, Dept. of Computer Science, KAIST, Korea

Marko Bertogna, University of Modena, Italy

Program Chair:

Michael González Harbour, Universidad de Cantabria, Spain

Finance Chair

Tei-Wei Kuo, Academia Sinica and
National Taiwan University, Taiwan

Design and Verification Track Chair:

Dionisio de Niz, Software Engineering Institute, USA

Workshops Chair:

Nathan Fisher, Wayne State University, USA

Work-in-Progress Chair

Rodolfo Pellizzoni, University of Waterloo, Canada
